

Syntron Electric Hammers

The Syntron Electric Hammer strikes a fast, powerful hammer blow directly on the shank of the tool.

The piston is the only moving part and is forced up and down by two powerful electric magnets wound around the barrel of the tamper. There are no motors, gears, connecting rods, bearings nor brushes to wear or break. Due to this simple construction, long life and low maintenance cost are assured.

Sectional View of the Syntron Hammer

The Hammer Without a Motor "Only One Moving Part"

Type MK-60

A lightweight hammer for drilling holes in concrete, masonry, marble, tile, etc., up to $\frac{5}{8}$ -inch diameter at the rate of $2\frac{1}{2}$ inches or more per minute. Also for light chipping, scaling, dressing stone, chiseling wood and vibrating.

Type AK-60

A very popular hammer among industrial plants for maintenance work and among all classes of contractors. It will drill holes in concrete, masonry, etc., up to $1\frac{1}{8}$ -inch diameter at the rate of $2\frac{1}{2}$ inches per minute or more.

Type C-60

This is the most powerful electric hammer ever built for its weight for operation from light sockets and will drill up to a $1\frac{1}{2}$ -inch diameter hole in concrete masonry at the rate of 3 inches or more per minute. On account of its light weight and great power, it is a wonderful tool for chipping and cutting. The great power, light weight and small size is made possible by forced ventilation.

Type R-60

The most powerful hammer built for operation from a lamp socket. Will drill holes in concrete and masonry up to 2-inch diameter at the rate of 3 inches or more per minute. It has the same cooling system and mechanical construction as Type C-60. It makes a fine tool for general contractors and others doing similar work.

Type	Voltage	Wgt.	Lgth.	Diam.	Blows Per Power Min. Ratio	Price
MK	110V., 60 Cy.	9 lbs.	10"	$3\frac{1}{4}$ "	3600 1	\$ 95.00

SYNTRON PORTABLE ELECTRIC SAFETY SAW

Visible Cutting Line

A saw that has more power and will do more work than any other saw of its size. Designed for most efficient speed with maximum torque at the saw tooth. This enables the SYNTRON saw to cut its way quickly through the hardest wood, fibre, bakelite, lead, brass, etc., leaving a smooth finish. It does a neat job, turns out a tremendous amount of work, and is quickly and easily handled.

The entire construction of the saw was designed with the utmost accessibility of all parts. It can be assembled or dissembled by an unskilled man in a very short time without chance of mistake.

You can't buy a better saw for the money!

40 % More Power Than Any Other Saw of Equal Size

Tilting Base

Built in Three Models

No. 20—2 in. cut.
No. 30—3 in. cut.
No. 40—4 in. cut.

Adjustable Base

Views of Same Operation Showing 100% Safety Guard Feature

Diameter of saw blade, rated capacity	7"	9"	11"
Diameter of saw blade, maximum capacity	8"	10"	12"
Weight	17 lbs.	24 lbs.	27 lbs.
Shipping weight	30 lbs.	36 lbs.	40 lbs.

Rip Saw Blade

7-inch, each	\$3.85	9-inch, each	\$5.00
8-inch, each	4.35	11-inch, each	6.30

Rip Saw Blade

A particularly fast blade for ripping all kinds of wood.

Cut-off Saw Blade

7-inch, each	\$3.85	9-inch, each	\$5.00
8-inch, each	4.35	11-inch, each	6.30

Cut-off Saw Blade

For fast cross-cutting. Makes a smooth cut.

Combination Blade

7-inch, each	\$3.85	9-inch, each	\$5.00
8-inch, each	4.35	11-inch, each	6.30

Combination Blade

A blade for ripping and cross-cutting in all kinds of wood.

Metal Cutting Blade

7-inch, each	\$3.50	9-inch, each	\$5.65
8-inch, each	4.35	11-inch, each	8.65

Metal Cutting Blade

Designed for cutting soft, light gauge metal. This blade has very fine teeth straight across the face.

Planer Saw Blade

7-inch, each	\$7.00	9-inch, each	\$ 8.95
8-inch, each	7.60	11-inch, each	11.15

Planer Saw Blade

For making very smooth cuts, both rip and cross-cut. Used for interior finish and trim.

Abrasive Disc

$\frac{1}{8}$ x 7, each	\$1.90	$\frac{1}{8}$ x 10, each	\$3.80
$\frac{1}{8}$ x 8, each	2.20	$\frac{1}{8}$ x 11, each	3.80
$\frac{1}{8}$ x 9, each	2.50		

Abrasive Disc

This disc is used for sawing and cutting slate, marble, asbestos, tile and porcelain, steel, etc.

COMPLETE OUTFIT

The SYNTRON saw outfit comes complete, ready for operation, and consists of

- 1 SYNTRON saw
- 1 Combination rip and cross-cut saw blade made of the finest quality of steel. Arbor hole U. S. Standard
- 1 Bevel cutting base
- 15 Feet of superior grade rubber-covered cable with attachment plug
- 1 Socket wrench for removing saw blade
- 1 Open-end wrench
- 1 Tube of SYNTRON saw grease
- 1 Set of instructions
- 1 Carrying case with handle and fasteners
